

ANCA ANN SHIBU

Profile

Passionate student with a solid foundation in programming, algorithms, and software development. Passionate about exploring new technologies and solving complex problems through innovative solutions. Eager to apply academic knowledge in real-world projects and contribute to the field of technology through hands-on experience and collaboration.

Projects

2023

Supply Chain Management System

- Implemented in C using Data Structures and Algorithms.
- Optimizes flow of goods and information from suppliers to consumers.
- Ensures efficient resource use by minimizing delays or disruptions.

2024

Task Manager

- Implemented using C++
- Manages users and tasks using a priority queue
- Allows suggesting users based on task load and tracks task completion times.
- Efficiently stores and retrieves data using file operations

2024

Gym Management System

- Implemented using MERN stack.
- Integrates various functions such as member registration, class scheduling.
